Foreword

This Standard replaces GB 7100-2003 “Hygienic standard for biscuits”. Compared with GB 7100-2003, the main changes are as follows:

- Modified the standard’s name as “National food safety standard - Biscuits”;
- Modified scope;
- Modified terms and definitions;
- Modified sensory requirements;
- Modified physiochemical indicators;
- Modified microbiological indicators.

National food safety standard - Biscuits

1 Scope

This Standard is applicable to biscuits.

2 Terms and definitions

2.1 Biscuits

A kind of food that uses cereal powder (and/or bean powder, potato powder) as main raw material; it is made by process such as powdering (or pulping), forming, baking (or grilling); with or without sugar, oil and other raw materials; it also refers to the food that is added with cream, egg white, cocoa, chocolate, etc. in between the products (or surface, or inside), before or after it is baked.

3 Technical requirements

3.1 Requirements for raw materials

Raw materials shall comply with the relevant food standards and provisions.

3.2 Sensory requirements

Sensory requirements shall comply with the provisions in Table 1.

Table 1 Sensory requirements

Item	Requirements	Inspection method
Color	The product shall have a normal color	Place the sample in a white porcelain bowl. Observe its color and state under natural light; check if there is foreign material. Smell it and taste it after rinsing mouth with warm water.
Taste, odor	No different smell, no odor	
State	No mildew, no vermin or other visible foreign materials by normal vision	

3.3 Physiochemical indicators

Physiochemical indicators shall comply with the provisions in Table 2.
