Classification of furniture materials

1 Scope

This standard specifies the classification and code of furniture materials.

This standard applies to the classification and coding principles, coding methods, classifications and codes of furniture materials.

2 Normative references

The following documents are essential to the application of this document. For the dated documents, only the versions with the dates indicated are applicable to this document; for the undated documents, only the latest version (including all the amendments) are applicable to this standard.

GB/T 2705-2003 Classification and nomenclature for coating products

GB/T 13304.1-2008 Steels classification - Part 1: Classification of according to chemical composition

GB/T 28202-2011 Furniture industry terminology

GB/T 28203-2011 Technical requirements and test methods of furniture connectors

3 Terms and definitions

The terms and definitions as defined in GB/T 28202-2011 AND the following terms and definitions apply to this document.

3.1

Furniture materials

Various materials used to form finished furniture.

3.2

Furniture filling materials

The inner core material which is used to fill the furniture; AND the elastic material that is filled inside the furniture and has an elastic effect.

3.3

Furniture packaging materials

Materials used for packaging finished furniture.

4 Classification and coding principles

4.1 In this standard, it classifies materials in two ways: by use and by attributes.

4.2 In this standard, it divides furniture materials into four levels: master category, large category, medium category, small category; compiles a uniform code. The code consists of 8 digits.

5 Coding method

5.1 The codes of master categories, large categories, medium categories, small categories in this standard shall be coded sequentially, starting from 01. When the levels of this standard are no longer further divided, the codes shall be supplemented with "00", until the 8th digit.

5.2 For each level of this standard, it needs setting up containment items which have the word "other", as needed. In order to facilitate identification, the code mantissa of the containment item is required to be "99" in principle.

5.3 The code structure diagram of this standard is as shown in Figure 1.

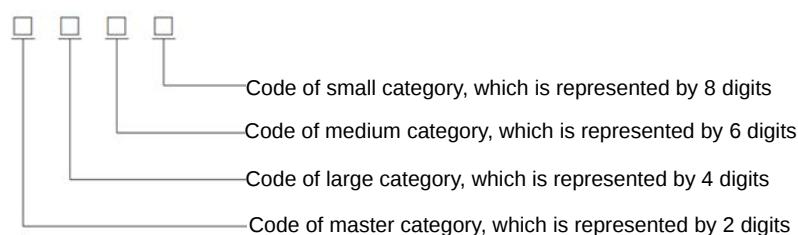

Figure 1 -- Structure diagram of code

Example: The code of master category is represented by 2 digits, which represent the different material categories that make up the furniture, such as furniture base material, furniture hardware accessories, etc. The code of large category is represented by 4 digits, which represent the specific material category after the further division of master category, such as wood, metals, plastics, etc. The code of medium category is represented by 6 digits, which represent various materials that are further divided from the materials that are organically connected to the large category, such as solid wood sawn timber after simple primary processing of logs AND solid wood panels after in-depth processing. The code of small category is represented by 8 digits, which

Full-copy PDF can be purchased from 1 of 2 websites:

1. <https://www.ChineseStandard.us>

- SEARCH the standard ID, such as GB 4943.1-2022.
- Select your country (currency), for example: USA (USD); Germany (Euro).
- Full-copy of PDF (text-editable, true-PDF) can be downloaded in 9 seconds.
- Tax invoice can be downloaded in 9 seconds.
- Receiving emails in 9 seconds (with download links).

2. <https://www.ChineseStandard.net>

- SEARCH the standard ID, such as GB 4943.1-2022.
- Add to cart. Only accept USD (other currencies - <https://www.ChineseStandard.us>).
- Full-copy of PDF (text-editable, true-PDF) can be downloaded in 9 seconds.
- Receiving emails in 9 seconds (with PDFs attached, invoice and download links).
